

Designing Artist Websites

In addition (to Creating and Exhibiting my Fine Art) **I also design websites for Artists.**

This is a source of income for me, but more importantly, it's taken on a purpose. I have met and seen the work of so many amazing artists who barely are visible to the world. I feel that by giving artists the chance to have their art work seen, I am actually creating the environment for a higher standard in Art. One in which Galleries (hopefully) will choose artists based on their creativity and technique; and no longer by a 'popularity contest' (which is often dependent on who has the best promoter/agent.) *

I know how you feel..... as I am an Artist as well as a designer. It all boils down to my belief that:

"alone we are just a candle in the wind... ..but...to be the fuel that inspires others to shine, one has the ability to illuminate the world."

Please let me know if you wish to use my services to create a beautiful web presence, for you, on the internet. Remember... the magic of the Internet is that we don't need to be connected, in person, to stay connected on the Internet. Please [email me](#) for more information and my design fees.

[My own Artist Website](#) is a unique design which was styled after the earlier "Weblogs"... It's a cleaned-up version that I created for my own amusement, as it is reminiscent of the earlier Websites, that existed, when I first started designing for the Internet.

But, if you wish to visit my latest Website Design please check out the one I recently set up (and am maintaining) for an Art Organization: www.salutetowomeninthearts.org

* This drive (to make more wonderful artists visible to the world) is the fuel behind the Series of Workshops I currently offer. They're called "Promoting yourself as an Artist shouldn't be an Abstract Idea". *Please check out the link on my website for this as well. Thank you.*
